**Product name**
(2,4-pentanedionato)carbonyl (triphenylphosphino)rhodium(I)

**Chemical formula**
Rh(CO)(PPh₃)(acac)

**Product code**
UK - 207000

* This product can be ordered worldwide under the UK product code.

**CAS Number**
25470–96–6

**Product family**
Pgm compound (solid)

**Process**
Hydroformylation

**Market**
Chemicals

**Benefits**
ROPAC is air stable, contains no halide and has good solubility in organic solvents. It has a higher rhodium content than Rh-42. It has been used for hydroformylation since the development of the low pressure oxo process in the 1970's.

**Application**
ROPAC catalyses hydroformylation reactions. It is normally used with ligands such as triphenylphosphine.

**Shipping & Handling**
Please refer to the relevant Safety Data Sheet for further information.

Form: solid
Rhodium content: 19.3–21.2 % w/w
Colour: yellow
