Benefits
Rh-50 is air stable, contains no halide and has good solubility in organic solvents. It has a higher rhodium content than ROPAC.

Application
Rh-50 catalyses hydroformylation reactions. It is sometimes used with ligands such as triphenylphosphine. It is more hazardous than ROPAC and has a significant vapour pressure. It should be handled with appropriate precautions.

Shipping & Handling
Rh-50 is a flammable and toxic solid which causes serious eye irritation and may cause an allergic skin reaction.

Please refer to the relevant Safety Data Sheet for further information.

Form: solid
Rhodium content: 38.5 - 40.0 % w/w
Colour: red/green (dichroic)
